

View from the CTO on

Emerging Technology

Chintan Patel, UK&I CTO, Cisco

The Chief Technology Officer (CTO) plays a pivotal role in navigating emerging trends and technologies.

Our keynote special guest, Chintan Patel will offer a comprehensive view of emerging technology trends, underscored by Cisco's strategic initiatives and partnerships. As we navigate the digital frontier, embracing innovation and cybersecurity readiness are paramount for a sustainable and connected future.

Chintan will touch on his top three technology trends, drawing inspiration from his renowned "Tech in 10" blog: Artificial Intelligence (AI), Cybersecurity, and Connectivity.

- **AI:** Revolutionising industries with transformative capabilities.
- **Cybersecurity:** Escalating cyber threats emphasize the need for robust defence mechanisms.
- **Connectivity:** Facilitating seamless interactions in an increasingly interconnected world.

At-A-Glance

Cisco's Roadmap: Aligning with strategic priorities, Cisco envisions an inclusive, sustainable, and secure digital ecosystem, leveraging partnerships and innovations.

Cisco x Splunk Collaboration: A pivotal partnership harnessing data-driven insights through AI, paving the way for enhanced connectivity.

Cybersecurity Readiness: Underscoring the pressing need for proactive measures amidst evolving threats, highlighted by the 2024 Cybersecurity Readiness Index.

Future Trends: Looking ahead to 2024, Chintan identifies key trends in AI, emphasising opportunities and risks, and Cisco's proactive approach in leveraging AI for reliable outcomes.
